## **Appendix - Main Modifications**

The modifications below are expressed either in the conventional form of strikethrough for deletions and <u>underlining</u> for additions of text, or by specifying the modification in words in *italics*.

The page numbers and paragraph numbering below refer to the submission ADMP, and do not take account of the deletion or addition of text.

Ref	Page	Policy/ Paragraph	Main Modification
MM1	P. 23	New Policy EN5 (Landscape)	The extensive area of landscape outside the towns and villages contributes significantly to the character of the District. The NPPF outlines the importance of protecting and enhancing valued landscapes and Policy LO8 of the Core Strategy ensures that the distinctive features that contribute to the special character of the landscape will be protected and, where possible, enhanced.  61% of the District is located within the Kent Downs or High Weald Areas of Outstanding Natural Beauty (AONB). The NPPF gives great weight to conserving and enhancing landscape and scenic beauty of Areas of Outstanding Natural Beauty, and their setting, giving them the highest status of protection. The distinctive character of the AONBs plays an important part in defining the overall character of Sevenoaks District. Proposals in AONBs will be assessed against Core Strategy Policy LO8, ADMP Policy EN5 and other relevant policies. The AONB Management Plans and associated guidance set out a range of measures to conserve and enhance the distinctive features of each AONB. Any proposal within the AONB must take into account the guidance set out in the appropriate AONB Management Plan and any relevant more specific AONB guidance for
			example the Kent Downs AONB Landscape Design Handbook (2006), Kent Downs AONB Farmstead Guidance (2012) and Managing

Inspector's Report: Main Modifications	Inspector's	Report:	Main	Modifications

Ref	Page	Policy/ Paragraph	Main Modification
			Land for Horses (2011).
			The character of the AONBs and the remainder of the countryside within the District is defined in the adopted Sevenoaks Countryside Assessment SPD. The SPD identifies a number of different character areas and will be used to assess the impact of proposals on landscape character. Tranquillity forms part of the character of certain parts of the landscape within the district as identified by the SPD. Proposals should respect the local landscape character and the specific features identified in the SPD. In addition, proposals should also enhance the character of the countryside by helping secure the landscape actions within the SPD where this would be feasible in relation to the proposal.
			New Policy EN5: Landscape
			The Kent Downs and High Weald Areas of Outstanding Natural Beauty and their settings will be given the highest status of protection in relation to landscape and scenic beauty. Proposals within the AONB will be permitted where the form, scale, materials and design would conserve and enhance the character of the landscape and have regard to the relevant Management Plan and associated guidance.
			Proposals that affect the landscape throughout the District will be permitted where they would
			a) conserve the character of the landscape, including areas of tranquillity, and
			b) where feasible help secure enhancements in accordance with landscape actions in accordance with the Sevenoaks Countryside Assessment SPD.
			Delivery Mechanisms:
			The Kent Downs and High Weald  Management Plans
			The Kent Downs AONB Landscape Design Handbook (2006), Kent Downs AONB

			Design and Layout
			If one element of the site is available for redevelopment in advance of the other, the development should be designed in such a way so as not to preclude the future integration of development, or the operation of the existing functions.

Ref	Page	Policy/ Paragraph	Main Modification
			The retention of the Post Office counter facility, providing the same range of services, in a prominent location in the town centre will be required. (for note only: the post/delivery office area has been included in the site allocation)
MM5	Appendix 5	Policy H2(f) Glaxo Smith Kline, Powder Mills, Leigh	Site Address: Glaxo Smith Kline, Powder Mills, Leigh  Development Guide:
			The site is allocated for residential-led mixed use development, including an element of employment space. 'Building 12' shown on the accompanying map should be retained for employment use, or equivalent B1 floorspace (1582sqm) should be provided within the site, with the remainder of the site laid out as residential development in a mix of unit types. Any proposal for residential development that does not include the retention of 'Building 12' or equivalent B1

Ref	Page	Policy/ Paragraph	Main Modification
			floorspace would need to justify the loss of employment in line with Policy SP8 of the Sevenoaks Core Strategy.  Infrastructure
			Unless it is confirmed that the proposed foul flow will be no greater than the existing contributing flows from existing premises, the development must provide a connection to the sewerage system at the nearest point of adequate capacity, as advised by Southern Water. The development should also ensure future access to the existing sewerage infrastructure, if required, for maintenance and upgrading purposes
MM6	P.28	Reserve Land Paragraph 3.10	3.10 In order to ensure that housing supply remains flexible the Core Strategy (through LO6) identifies land at Enterprise Way Edenbridge as a reserve site for housing. The policy states that the site cannot be brought before 2015 and should only be developed in the plan period if the Council cannot identify an adequate five year housing supply would be brought forward for development after 2015 only if required to maintain a five year supply of housing land in the District.  However, following publication of the NPPF, it is considered that there is a need to bring forward the reserve site now to boost the supply of housing in the District where this would not conflict with strategic objectives
			(such as protection of the Green Belt and AONB) and the site is included in the residential development allocations in Policy H1. The site has scope for a mix of different types of affordable and market housing. This could include accommodation contributing to housing supply for those with particular needs including a care home facility.

			The site zone 3a accompa			

Ref	Page	Policy/ Paragraph	Main Modification
			development should be located within this area and sustainable drainage systems (SUDS) will be required as part of any scheme, together with a flood risk assessment. This river corridor should form a feature of the site, and should be managed and enhanced for biodiversity and recreation, in addition to its primary purpose as functional flood plain. Residential development should be located north and south of the constrained flood area.
			The development will need to be designed to minimise its impact on the Green Belt/open farmland to the west and scheme design, including building heights and density, should reflect the edge of settlement location of this site. The relationship of the development to the railway lines to the north and south and to the residential and industrial estate to the east will need to be carefully addressed. Proposals should not prejudice the operation of the existing industrial estate, or compromise the amenity of existing and future residents.
			The size and context of the site make it suitable for a range of housing types, sizes and tenures, including affordable housing in accordance with Council policy. This site is also considered suitable for housing designed for older people (including those with special needs), as it is close to a range of services that would provide for the needs of future occupants.
			Landscape
			The TPO trees within and adjacent to the site should be preserved and form an integral part of the scheme. Landscaping and planting should be integrated into the development and will be required to screen the site from the adjacent countryside, and to provide a buffer between the railway lines, industrial estate, existing residential and the development site. These buffers will also provide biodiversity corridors which will enhance the green infrastructure network and make connections beyond the site. The river corridor should also include biodiversity

Ref	Page	Policy/ Paragraph	Main Modification
			enhancements. Site biodiversity surveys will be required to ensure any biodiversity concerns are adequately mitigated.
			Provision of public open space will be required to support the development. The type and layout of open space will be a matter for consultation with the local community, but could include amenity greenspace, children's playspace and allotments, as outlined in the Council's Open Space Study.
			Access
			The primary access to the site should be from St John's Way, with secondary access from Enterprise Way. The existence of the flood zone in centre of the site reinforces the need for multiple accesses.
			A Transport Assessment will be required to support any future application for the development of the site. Walking / cycling routes into Edenbridge town centre and to Edenbridge / Edenbridge Town station should be improved.
			Infrastructure
			Contributions to CIL will be required. This should facilitate contributions to mitigate impacts of the development on infrastructure, including education. The development should provide a connection to the sewerage system at the nearest point of adequate capacity, as advised by Southern Water
			Delivery - Principal site owner promoting site for development. The site could come forward in phases, provided no one phase of development would prejudice the development of the area as a whole.

Ref	Page	Policy/ Paragraph	Main Modification
			the Council will, where relevant and amongst other potentially relevant site-specific issues, have regard to the extent to which the evidence from the applicant suggests that:
			there is insufficient forecast demand for the specific land uses currently on the site; the location and accessibility of the site prevents it from being attractive for business uses, including any specific types of provision (including business start up units or serviced offices) that may be most appropriate for the location; the quality of existing buildings and infrastructure requires refurbishment or redevelopment which evidence suggests would not be viable, if necessary; and the redevelopment for alternative uses would provide non-business use (Use Class B) jobs.  He Core Strategy Policy SP8 promotes a flexible approach to the use of land for business and employment purposes and as such it is the role of this document to formally identify the sites to which Policy SP8 of the Core Strategy applies.
MM8	P.41 - 43	Fort Halstead Policy EMP3	Fort Halstead
			4.13 Fort Halstead is a previously developed site within the Green Belt and the Kent Downs AONB that was originally a Ministry of Defence research establishment and is still occupied by defence related industries. It remains a major employer in the District.
			4.14 Proposals for a major residential-led mixed use redevelopment of the site were considered and rejected through the Core Strategy process. However the Core Strategy states (para 4.5.21) that the main requirements of the current occupiers of Fort Halstead, QinetiQ and the Defence Science and Technology Laboratory (DSTL), may vary during the Plan period. It adds that the implications of a future decline in occupancy of the site will be considered within the policy framework of the Core Strategy and relevant national planning policy
			4.15 Since the adoption of the Core Strategy,

Ref Page	Policy/ Paragraph	Main Modification
		DSTL, the largest employer, has announced its intention to withdraw from the site by 20162017/8. The Council is working with DSTL, QinetiQ and the site owners to assess and mitigate the impact on the local economy of the planned withdrawal. It will also be working with the owners and other interested parties to develop achievable proposals for the future use and redevelopment of the site. The landowners have stated their intention to bring forward a planning application to redevelop the site for a mix of uses including commercial and residential.
		4.16 Any proposals will be tested against the policy framework provided by the Core Strategy and relevant national policy. The Green Belt status of the site constrains the scale of development that can acceptably be accommodated, while its AONB status provides a further constraint on future development. However, there is substantial development on the site at present, as set out in the CLUED granted by SE/03/02897/LDCEX, and it remains an important employment site subject to Core Strategy Policy SP8 on the protection and regeneration of such sites. The Council will therefore expect future redevelopment to be employment-led, though it recognises that in view of the size of the site and the specialist nature of some of the buildings that there may be some scope for widening the mix of uses if required to support the employment-led regeneration, subject to policy considerations. The size of the site makes it feasible to accommodate a range of housing types and tenures. Policy considerations include the requirement for the resultant development to comply with sustainability principles, including conserving and enhancing the Kent Downs AONB, and sustainable transport proposals for accessing the site. The District Council will expect redevelopment proposals to provide for approximately 1200 jobs which were provided on site prior to the announced withdrawal of DSTL. The departure of DSTL creates an opportunity to redevelop the site to meet modern business needs. Any

Ref	Page	Policy/ Paragraph	Main Modification
			broad objectives:
			1. It should be employment-led and should maintain the site's role as an important employment site in the District. Provision should be made for a range of employment uses sufficient to provide for approximately 1,200 jobs, equivalent to the level of employment on site prior to the announced withdrawal of DSTL. There should be flexibility to accommodate types of business with different space needs. Employment-uses should include provision for the retention of Qinetiq in premises to meet their needs and opportunities to attract and accommodate similarly high skilled jobs should be fully explored and planned for. Although not an essential requirement there would be some benefit in including a hotel which could complement other development on the site and assist in improving hotel provision in the District.  2. It should be deliverable. The Council
			2. It should be deliverable. The Council recognizes that delivery of employment-led redevelopment is dependent on the development being viable. It has reviewed the viability of options for redevelopment in the light of the landowner's emerging proposals. This review shows that redevelopment for employment use alone would not be viable and therefore unlikely to come forward in a period that would enable the jobs lost by the departure of DSTL to be replaced in a timely manner. However, with the inclusion of residential development alongside the employment uses, there is the prospect of making the whole development viable. There is substantial development on the site at present, and a CLUED has been granted by the Council (SE/03/02897/LDCEX). The existing employment density of the site is relatively low which means there is scope to replace the existing jobs in a redevelopment on only part of the site creating space for significant residential development as part of a comprehensive development while still keeping within the existing developed area. Evidence produced on behalf of the landowner and reviewed by the Council shows that a development providing

Ref	Page	Policy/ Paragraph	Main Modification
			replacement employment provision and incorporating approximately 450 dwellings could potentially be accommodated within the existing built confines and without adverse impact on the AONB or an increase in development in the Green Belt. Such a development represents a useful addition to the Council's housing land supply and should enable a range of housing types and tenures to be included.
			3. It should be comprehensive. Fort Halstead is a large site and the departure of DSTL could effectively render the whole site redundant unless redevelopment is undertaken. Redevelopment needs to be comprehensive and integrated to ensure a high quality outcome for the whole site and secure a viable future for QinetiQ on the site. A development agreement and phasing plan will be needed to ensure that the development is delivered as a whole in a timely way and in a way that is truly employment-led.
			4. It should comply with sustainable development principles. This should include provision of appropriate community facilities on site proportionate to the scale of the development, sustainable transport proposals for accessing the site, sustainable construction methods and provision of green infrastructure and measures to conserve and enhance the Kent Downs AONB in which the site is situated.
			5. It should result in no increased impact on the openness of the Green Belt and AONB within which the site lies. This means that development should be contained within the Major Employment Site boundary. In addition the overall quantity of development on the site should not increase (with the CLUED used a a reference point) and the height of buildings should also be contained to avoid any increased visual impact on the surrounding area. Existing woodland around the site incorporates ancient woodland that should be protected in its own right but in addition needs to be retained to ensure the developed site remains well-screened. As far as possible, the overall development should

Inspector's Report: I	Main Modifications

			contribute positively to the AONB.
			4.17 At this stage it is considered premature to set out a detailed proposal for future redevelopment and Policy EMP3 instead sets out broad sets out requirements for future development and the principles that will apply when redevelopment proposals are being considered. The delivery mechanism to the policy proposes the preparation of a development brief for the site to provide a more specific agreed planning framework.
			4.18 The Core Strategy states (para 4.5.20) that the defined boundary of the site from the Saved Local Plan will be reviewed to more fully reflect the developed area in business use. This review has been carried out and the new boundary is shown in Appendix 6
			Policy EMP3 - Redevelopment of Fort Halstead
			Fort Halstead, as defined in Appendix 6, is allocated as a Major Employment Site in the Green Belt.
			Redevelopment proposals will be expected to achieve a range of employment uses appropriate to an employment site such as research and development serviced offices and workshops or land based employment, and generate at least the number of jobs that the site accommodated immediately prior to the announced withdrawal of DSTL from the site. Redevelopment may also include a hotel. Land based employment, such as the management of the woodland and downland will also be supported, subject to the criteria below.
			Residential development of up to 450 units may also be permitted provided it forms part of a mixed used scheme that delivers an employment-led development and is designed and sited in a way that is consistent with the provision of a range of employment uses appropriate to an employment site. It must also comply with other aspects of the

Inspector's Report	: Main	Modifications
--------------------	--------	---------------

Ref	Page	Policy/ Paragraph	Main Modification
			policy.
			The inclusion of appropriate community facilities and infrastructure to support the sustainable development of the site consistent with the policy will be required.
			Redevelopment of the site will maintain or reduce the amount of built development on the site and be fully contained within the Major Employment Site Boundary. It should have no greater impact on the openness of the Green Belt. The height of the buildings must take into account the need to conserve and enhance the natural beauty of the countryside in this location.
			Redevelopment proposals, including those to widen the mix of uses on site, such as including an element of residential development and a hotel, would be expected to:
			- Be sustainable in respect of the location, uses and quantum of development and be accompanied by a Travel Plan incorporating binding measures to reduce dependency of future occupants on car use;
			- Provide accessibility to jobs, shops and services by public transport, cycling or walking, including proposals for onsite provision proportionate to the proposed development;
			- Make a positive contribution to the achievement of aims and objectives of the Kent Downs AONB Management Plan and conserve and enhance the natural beauty and tranquillity of the Kent Downs Area of Outstanding Natural Beauty;
			- Confirm, by way of a Transport Assessment, that the development would not have an unacceptable adverse impact on the local and strategic road networks;
			- Protect and integrate the Scheduled Ancient Monument and listed buildings into
