Completions

1.5 The 2019/20 monitoring year saw a net increase in completed commercial development of 914 sqm including additions to existing sites as well as some new sites.

1.6 There was a loss of 4,432 sqm in commercial development to residential in the monitoring year, the largest of these was a loss of 2,700 sqm at Warren Court Farm where 29 dwellings

were built. A total of 441 sqm of B1A office use space was also redeveloped or changed to residential use in this monitoring year, as shown in Table 4.

The gains in this table refers only to gains within these specific development sites.

Consented

1.8 The consented planning permissions, if implemented, would result in a net loss of 4,508 sqm of commercial development, including some complete losses as well as reductions on existing sites.

1.9 The loss in consented developments was in part due to an overall 7,701 sqm change of use or redevelopment from employment space to residential or mixed residential use developments. Of this, 11 developments totalling 2,846 sqm of B1A class office space was consented for conversion or redevelopment to residential use.

1.10 The consented sites for this monitoring year with notable gains in employment space (sqm) are listed below in Table 6. These were also the only major employment sites consented for this monitoring year.

Table 6. Consented development sites with highest gains of employment space (sqm).

Location	Proposal	Use Class	Proposed total space	Gain in space
Swanley Centre London Road Swanley	Hybrid application for the phased redevelopment of part of the Swanley Square Shopping Centre and land to the rear.	AB mix/ D1	5,276	2,996

1.11 Tables 3, 4, 5, and 6 show losses and gains for sites and within use classes, which are not obviously reflected in the overall gains and losses for this year. Some developments completed and consented in this monitoring year were a change of use or redevelopment into a different employment use class. Such sites either had equal or additional employment floorspace in a different use class and so such sites may have not contributed substantially overall to the losses and gains recorded for the monitoring year.
