## Consented

Of this, 13 developments totalling 3,804.22 sqm of Eg class office space was consented for conversion or redevelopment to residential use.

1.10 The consented sites for this monitoring year with notable gains in employment space (sqm) are listed below in Table 6. These were also the only major employment sites consented for this monitoring year.

1.11 Tables 3, 4, 5, and 6 show losses and gains for sites and within use classes, which are not obviously reflected in the overall gains and losses for this year. Some developments completed and consented in this monitoring year were a change of use or redevelopment into a different employment use class. Such sites either had equal or additional employment floorspace in a different use class and so such sites may have not contributed substantially overall to the losses and gains recorded for the monitoring year.
